

Behavioral Health Coding Resource

This resource outlines key CPT® codes that physicians and their care teams can use (as appropriate) when administering behavioral health screening, treatment, and/or preventative services [telemedicine-related codes highlighted with a ••]. Codes are mapped to the behavioral health integration (BHI) model continuum to help physicians quickly determine which sets of codes might be most relevant to their practice.

NOTE: Please consult the CPT code set to verify that the code selected best reflects the work performed as noted in the code descriptors.

CPT® Codes Across the BHI Continuum

CP1® Codes Across the BHI Continuum			
Co-Location		Col	laborative Care
A	В	C	D
Preventive Medicine	Psychotherapy	Adaptive Behavior services	General Behavioral Health Integration
99401, 99402, 99403, 99404, 99411, 99412	90832,90833,90834, 90836,90837,90838,	97151, 97152, 97153,	Care Management
	90853	97154, 97155, 97156,	99484
Behavior Change Interventions		97157, 97158	Dovehistric
	Developmental	Haalth Bahaviar	Psychiatric Collaborative Care
99406, 99407, 99408, 99409	Behavioral Screening 96127, 96110, 96161	Health Behavior Assessment and Intervention 96156, 96158, 96159,	Management 99492, 99493, 99494, G2214
		96160, 96161, 96164, 96165, 96167, 96168 96170, 96171	Cognitive Assessment and Care Plan Services 99483
			Inter-professional Digital Services 99446-9, 99451, 99452
			CoCM General Management (Medicare) G0511
			Psychiatric Collaborative Care Model (Medicare) G0512

Under Co-Location the behavioral health specialist is physically located in a primary care clinic, or the primary care physician or other clinician is physically located in a mental health or substance use disorder treatment setting. The distinguishing feature here is physical proximity. Codes under Column A and Column B both fall under co-location.

Column [A] Codes: Counseling Risk Factor Reduction and Behavioral Change Intervention *These codes* are intended to be preventive in nature/used prior to formal diagnosis in the hopes of addressing issues before they become larger health issues. They do not require a large team to implement.

Preventive Medicine

- 99401, 99402 99403, 99404 (Individual)
- 99411, 99412 (Group)

Behavior Change Interventions

- 99406, 99407 Smoking and tobacco use cessation counseling visit 🕡 🤒
- 99408, 99409 Alcohol and/or substance (other than tobacco) abuse structured screening, brief intervention (SBI) services 1 99

Column [B] Codes: These are behavioral health-focused codes that do not, depending on the capabilities of your practice, require larger collaboration.

Psychotherapy

- 90832, 90834, 90837 Psychotherapy (30, 45, 60 min) 10 90
 Real-time audio-visual required, has a modifier 95 that can be recorded with codes
- 90853 Group Psychotherapy

Developmental / Behavioral Screening

- 96127 Brief emotional/behavioral assessment (e.g., depression inventory, attention-deficit/ hyperactivity disorder [ADHD] scale), with scoring and documentation, per standardized instrument
- 96110 Developmental screening (e.g., developmental milestone survey, speech and language delay screen), with scoring and documentation, per standardized instrument
- 96161 1 2 Administration of caregiver-focused health risk assessment instrument (e.g., depression inventory) for the benefit of the patient, with scoring and documentation, per standardized instrument

Under Integrated Care the practice team includes primary care and behavioral health physicians and other clinicians working together with patients and families, using a systematic, seamless approach to provide patient-centered care for a defined population. The defining feature here is practice change. Codes under Column C and Column D fall under integrated care.

Column [C] Codes: This is where we begin to see a clear focus on behavioral health with a broader range of roles for the care team that allow the physician or the qualified health care professional to bill the code.

Adaptive Behavior Services

• 97151, 97152 (Assessment), 97153-97158 (Treatment)

 Address deficient adaptive behaviors, maladaptive behaviors, or other impaired functioning secondary to deficient adaptive or maladaptive behaviors (e.g. instruction following, verbal and nonverbal communication, imitation, play and leisure, social interactions, self-care, daily living, personal safety)

Health Behavior Assessment and Intervention

- 96156-96171 (Individual, Group, Family)
- Focus on psychological, behavioral, emotional, cognitive, and interpersonal factors complicating medical conditions and treatments

Column [D] Codes: These are some of the most comprehensive codes for an expansive coordination model with a physician or a qualified health professional guiding the work of a defined team. Codes in this section are reported over an extended period of time.

Care Management

- 99484 General Behavioral Health Integration Care Management
- 99492-99494, G2214 Psychiatric Collaborative Care Management

Inter-professional Digital Services

- 99446-9, 99451 Professional-to-professional digital consultation, billable by the consulting psychiatrist
- 99452 Professional-to-professional digital consultation, billable by the primary care professional (telephone/Internet/EHR referral services)

Cognitive Assessment and Care Plan Services, 99483

- Provided when a comprehensive evaluation of a new or existing patient who exhibits signs and/or symptoms of cognitive impairment is required to establish or confirm a diagnosis, etiology and severity for the condition
- Thorough evaluation of medical and psychosocial factors, potentially contributing to increased morbidity

CoCM General Care Management (Medicare), G0511

Psychiatric Collaborative Care Model (Medicare), G0512

Modifier 25 may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed.

- A significant, separately identifiable E/M service is defined or substantiated by documentation that satisfies the relevant criteria for the respective E/M service to be reported (See Evaluation and Management Services Guidelines for instructions on determining level of E/M service)
- The E/M service may be prompted by the symptom or condition for which the procedure and/ or service was provided. As such, different diagnoses are not required for reporting of the E/M services on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service.

NOTE: This modifier is not used to report an E/M service that resulted in a decision to perform surgery (See modifier 57). For significant, separately identifiable non-E/M services, see modifier 59.

Modifier 93 (in effect as of Jan. 1, 2023) may be used for reporting audio-only services when appended with Modifier 93. Procedures on this list involve electronic communication using interactive telecommunications equipment that includes, at a minimum, audio. The codes eligible to be reported with this modifier are indicated in Appendix T in *CPT*® 2023 Professional Edition, which include those marked with a ② above.

A significant, separately identifiable E/M service is defined or substantiated by documentation
that satisfies the relevant criteria for the respective E/M service to be reported (See Evaluation and
Management Services Guidelines for instructions on determining level of E/M service)

NOTE: Modifier 93 (audio-only) and Modifier 95 (audio-visual) are not fully interchangeable. Some codes are eligible for reporting with either modifier, but the list of CPT codes eligible to report Modifier 93 is more focused than that for Modifier 95.
